## Job Description

We are seeking a talented Python Backend Engineer to join our engineering team. You will be responsible for building and maintaining scalable backend services that power our applications. This role requires strong problem-solving skills and experience with modern backend technologies.

## Key Responsibilities

- Write clean, maintainable, and well-documented code
- Develop microservices architecture using modern frameworks
- Participate in code reviews and technical discussions
- Collaborate with frontend developers to integrate APIs
- Design and implement scalable backend services and RESTful APIs

## Required Skills

- Microservices
- Spring Boot
- Java

- Django
- Express.js
- Python
- Kotlin

## Preferred Skills

- GraphQL
- FastAPI
- REST API

## Requirements

- Bachelor's or Master's degree in Computer Science, Engineering, or related field
- Strong problem-solving and analytical skills
- Excellent communication and teamwork abilities
- Passion for technology and continuous learning
- 5+ years of professional experience
- Experience mentoring junior developers
- Strong leadership and architectural skills

## Benefits

- Gym membership
- Latest technology equipment
- Team building activities
- Career advancement opportunities
- Parental leave
- Paid vacation and holidays
