Job Description

We are seeking a talented Software Development Engineer to join our engineering team. You will be responsible for building and maintaining scalable backend services that power our applications. This role requires strong problem-solving skills and experience with modern backend technologies.

Key Responsibilities

- Implement authentication and authorization mechanisms
- Collaborate with frontend developers to integrate APIs
- Design and implement scalable backend services and RESTful APIs
- Optimize database queries and ensure data integrity
- Develop microservices architecture using modern frameworks
- Write clean, maintainable, and well-documented code
- Participate in code reviews and technical discussions
- Monitor application performance and troubleshoot issues

Required Skills

- RabbitMQ
- Django
- REST API
- Python

Preferred Skills

- Node.js
- Microservices
- Spring Boot
- Go

Requirements

- Bachelor's or Master's degree in Computer Science, Engineering, or related field
- Strong problem-solving and analytical skills
- Excellent communication and teamwork abilities
- Passion for technology and continuous learning
- 5+ years of professional experience
- Experience mentoring junior developers
- Strong leadership and architectural skills

Benefits

- Flexible working hours
- Competitive salary package
- Performance bonuses
- Team building activities
- Gym membership
- Latest technology equipment
