Job Description

We are seeking a talented Senior Node.js Developer to join our engineering team. You will be responsible for building and maintaining scalable backend services that power our applications. This role requires strong problem-solving skills and experience with modern backend technologies.

Key Responsibilities

- Design and implement scalable backend services and RESTful APIs
- Implement authentication and authorization mechanisms
- Write clean, maintainable, and well-documented code
- Optimize database queries and ensure data integrity
- Monitor application performance and troubleshoot issues
- Participate in code reviews and technical discussions

Required Skills

- GraphQL
- Spring Boot

- MongoDB
- Django
- Grafana

Preferred Skills

- Node.js
- Express.js

Requirements

- Bachelor's or Master's degree in Computer Science, Engineering, or related field
- Strong problem-solving and analytical skills
- Excellent communication and teamwork abilities
- Passion for technology and continuous learning
- 3-5 years of professional experience
- Proven track record of delivering projects

Benefits

- Stock options
- Parental leave
- Health insurance coverage
- Gym membership
- Team building activities
- Remote work options
- Professional development budget
- Paid vacation and holidays
- Competitive salary package
- Annual training allowance
