## Key Responsibilities

- Optimize database queries and ensure data integrity
- Monitor application performance and troubleshoot issues
- Design and implement scalable backend services and RESTful APIs
- Develop microservices architecture using modern frameworks
- Collaborate with frontend developers to integrate APIs

## Required Skills

- REST API
- GraphQL
- Go

- Node.js
- Microservices
- Prometheus

## Preferred Skills

- Spring Boot
- Redis
- RabbitMQ
- Django

## Requirements

- Bachelor's or Master's degree in Computer Science, Engineering, or related field
- Strong problem-solving and analytical skills
- Excellent communication and teamwork abilities
- Passion for technology and continuous learning
- 3-5 years of professional experience
- Proven track record of delivering projects

## Benefits

- Paid vacation and holidays
- Health insurance coverage
- Career advancement opportunities
- Gym membership
- Modern office environment
- Remote work options
- Competitive salary package
- Annual training allowance
