Job Description

We are hiring a Data Engineer to help us unlock insights from our data. You will design and build data pipelines, develop ML models, and work with large-scale datasets to solve complex business problems.

Key Responsibilities

- Optimize data processing and storage
- Implement data quality checks and monitoring
- Develop machine learning models and algorithms
- Collaborate with data scientists and analysts
- Design and build scalable data pipelines
- Process and analyze large datasets
- Deploy ML models to production
- Document data workflows and models

Required Skills

- PyTorch
- Airflow
- Pandas
- Network Security

Preferred Skills

- Spark
- Scikit-learn
- Hadoop
- Python

Requirements

- Bachelor's or Master's degree in Computer Science, Engineering, or related field
- Strong problem-solving and analytical skills
- Excellent communication and teamwork abilities
- Passion for technology and continuous learning
- 3-5 years of professional experience
- Proven track record of delivering projects

Benefits

- Performance bonuses
- Competitive salary package
- Career advancement opportunities
- Gym membership
- Team building activities
- Remote work options
- Modern office environment
- Paid vacation and holidays
