Job Description

We are seeking a talented Python Backend Engineer to join our engineering team. You will be responsible for building and maintaining scalable backend services that power our applications. This role requires strong problem-solving skills and experience with modern backend technologies.

Key Responsibilities

- Develop microservices architecture using modern frameworks
- Monitor application performance and troubleshoot issues
- Optimize database queries and ensure data integrity
- Implement authentication and authorization mechanisms
- Write clean, maintainable, and well-documented code
- Collaborate with frontend developers to integrate APIs
- Participate in code reviews and technical discussions
- Design and implement scalable backend services and RESTful APIs

Required Skills

- Java
- Node.js
- PostgreSQL
- RabbitMQ
- Microservices
- PyTorch
- TensorFlow

Preferred Skills

- Redis
- GraphQL

Requirements

- Bachelor's or Master's degree in Computer Science, Engineering, or related field
- Strong problem-solving and analytical skills
- Excellent communication and teamwork abilities
- Passion for technology and continuous learning
- 0-2 years of professional experience
- Understanding of software development fundamentals

Benefits

- Modern office environment
- Team building activities
- Career advancement opportunities
- Parental leave
- Annual training allowance
- Remote work options
- Gym membership
