Job Description

We are hiring a Data Engineer to help us unlock insights from our data. You will design and build data pipelines, develop ML models, and work with large-scale datasets to solve complex business problems.

Key Responsibilities

- Deploy ML models to production
- Document data workflows and models
- Collaborate with data scientists and analysts
- Optimize data processing and storage
- Design and build scalable data pipelines
- Process and analyze large datasets

Required Skills

- Airflow
- Scikit-learn

- Pandas
- Hadoop
- Kafka
- Spark
- Security Auditing
- OWASP

Preferred Skills

- NumPy
- TensorFlow
- PyTorch

Requirements

- Bachelor's or Master's degree in Computer Science, Engineering, or related field
- Strong problem-solving and analytical skills
- Excellent communication and teamwork abilities
- Passion for technology and continuous learning
- 0-2 years of professional experience
- Understanding of software development fundamentals

Benefits

- Paid vacation and holidays
- Gym membership
- Remote work options
- Career advancement opportunities
- Team building activities
- Parental leave
- Annual training allowance
- Stock options
- Professional development budget
- Modern office environment
