Job Description

We are seeking a talented Microservices Engineer to join our engineering team. You will be responsible for building and maintaining scalable backend services that power our applications. This role requires strong problem-solving skills and experience with modern backend technologies.

Key Responsibilities

- Design and implement scalable backend services and RESTful APIs
- Collaborate with frontend developers to integrate APIs
- Write clean, maintainable, and well-documented code
- Implement authentication and authorization mechanisms
- Develop microservices architecture using modern frameworks
- Optimize database queries and ensure data integrity

Required Skills

- RabbitMQ

- Redis

- GraphQL

- Spring Boot

- REST API

- Angular

- Tailwind

Preferred Skills

- Express.js

- Python

Requirements

- Bachelor's or Master's degree in Computer Science, Engineering, or related field

- Strong problem-solving and analytical skills

- Excellent communication and teamwork abilities

- Passion for technology and continuous learning

- 0-2 years of professional experience

- Understanding of software development fundamentals

Benefits

- Paid vacation and holidays

- Professional development budget

- Parental leave

- Annual training allowance

- Remote work options

- Team building activities

- Health insurance coverage
