Job Description

As a Infrastructure Automation Engineer, you will be instrumental in automating our infrastructure and improving our deployment processes. We need someone who can build reliable CI/CD pipelines and ensure our systems are scalable and secure.

Key Responsibilities

- Manage cloud infrastructure and resources
- Build and maintain CI/CD pipelines
- Monitor system performance and implement alerting
- Document infrastructure and processes
- Troubleshoot production issues and incidents
- Automate infrastructure provisioning using IaC tools
- Optimize deployment processes and reduce downtime

- Implement security best practices and compliance

Required Skills

- GCP
- AWS
- CI/CD
- Prometheus
- Kubernetes
- Ansible

Preferred Skills

- Jenkins
- Azure
- Terraform

Requirements

- Bachelor's or Master's degree in Computer Science, Engineering, or related field
- Strong problem-solving and analytical skills
- Excellent communication and teamwork abilities
- Passion for technology and continuous learning
- 0-2 years of professional experience
- Understanding of software development fundamentals

Benefits

- Latest technology equipment
- Health insurance coverage
- Professional development budget
- Performance bonuses
- Flexible working hours
- Parental leave
