Job Description

We are seeking a talented API Development Engineer to join our engineering team. You will be responsible for building and maintaining scalable backend services that power our applications. This role requires strong problem-solving skills and experience with modern backend technologies.

Key Responsibilities

- Design and implement scalable backend services and RESTful APIs
- Monitor application performance and troubleshoot issues
- Optimize database queries and ensure data integrity
- Collaborate with frontend developers to integrate APIs
- Write clean, maintainable, and well-documented code
- Develop microservices architecture using modern frameworks

Required Skills

- Go
- RabbitMQ

- Microservices
- Express.js
- Scikit-learn
- Computer Vision

Preferred Skills

- Django
- Python
- REST API
- PostgreSQL

Requirements

- Bachelor's or Master's degree in Computer Science, Engineering, or related field
- Strong problem-solving and analytical skills
- Excellent communication and teamwork abilities
- Passion for technology and continuous learning
- 3-5 years of professional experience
- Proven track record of delivering projects

Benefits

- Performance bonuses
- Professional development budget
- Stock options
- Health insurance coverage
- Career advancement opportunities
- Modern office environment
